

CONTENTS

1	Getting started	1
1.1	Things you need to know	1
1.2	Setting up the system locale	2
1.3	Quickly starting Django on a server	4
1.4	Things we need to fix	7
2	DNS	9
2.1	Introduction to the DNS	9
2.2	Registering a domain name	13
2.3	Adding records to your domain	14
2.4	Changing the domain's name servers	17
2.5	Editing the hosts file	19
2.6	Visiting your Django project through the domain	20
2.7	Chapter summary	20
3	Users and directories	23
3.1	Creating a user and group	23
3.2	The program files	25
3.3	The data directory	26
3.4	The log directory	27
3.5	The production settings	27

3.6	Running the Django server	32
3.7	Chapter summary	35
4	The web server	37
4.1	Installing nginx	37
4.2	Configuring nginx to serve the domain	38
4.3	Configuring nginx for django	41
4.4	Installing Apache	44
4.5	Configuring Apache to serve the domain	44
4.6	Configuring Apache for django	47
4.7	Chapter summary	49
5	Static and media files	51
5.1	Setting up Django	51
5.2	Setting up nginx	52
5.3	Setting up Apache	53
5.4	Media files	57
5.5	File locations	58
5.6	Chapter summary	59
6	Gunicorn	61
6.1	Why Gunicorn?	61
6.2	Installing and running Gunicorn	62
6.3	Configuring systemd	66
6.4	More about systemd	68
6.5	Chapter summary	70
7	Django production settings	73
7.1	Email	73
7.2	Debug	78
7.3	Using a local mail server	78
7.4	Secret key	82
7.5	Logging	82
7.6	Caching	85
7.7	Recompile your settings	85

7.8	Chapter summary	87
8	PostgreSQL	91
8.1	Why PostgreSQL?	91
8.2	Getting started with PostgreSQL	92
8.3	PostgreSQL connections	95
8.4	PostgreSQL roles and authentication	97
8.5	PostgreSQL databases and clusters	101
8.6	Further reading	104
9	Recovery part 1	107
9.1	Why “recovery”?	107
9.2	Where to backup	108
9.3	Estimating storage cost	109
9.4	Setting up backup storage	111
9.5	Setting up duplicity and duply	112
9.6	Duply configuration	115
9.7	Excluding files	119
9.8	Additional directories for excluding or including	122
9.9	Backing up databases	127
9.10	Running scheduled backups	130
9.11	Chapter summary	131
10	Recovery part 2	135
10.1	Restoring a file or directory	135
10.2	Restoring SQLite	136
10.3	Restoring PostgreSQL	136
10.4	Restoring an entire system	139
10.5	Recovery testing	143
10.6	Copying offline	145
10.7	Storing and rotating external disks	148
10.8	Recovering from offline backups	149
10.9	Scheduling manual operations	150
10.10	Chapter summary	151
